[dhosy@esaip.org](mailto:dhosy@esaip.org)

ESAIP at Saint Barthélémy d'Anjou

**08/05/2019, 11.30 a.m.**  
**Room 140/D5**

#### Abstract

Discovering boredom at work and exploring the societal consequences. Through some records of people, understanding the health consequences and finding the solutions to fight against boredom at work. This seminar also introduces the theoretical model about boredom at work and you can discover your individual predisposition about boredom. Finally, exploring the connection between boredom and commitment at work.

#### Short bio:

After a commitment in French Navy, Delphine Hosy obtained a Master degree in Occupational Health- Safety, Environment and Quality. Since 2004, she has been a lead auditor for standards in quality, environment, health and safety. Before becoming teacher in esaip, she had her own company in risk management for almost 10 years. Currently, she teaches about human factors, systemic approach, risk prevention and occupational health and safety and carries on some advice missions in QSE for industrial sites. In 2017, she wrote with Bourion, C. an article called "From the boredom to the bore out".

*All interested people, particularly PhD students, are invited to attend the seminar*
